Windows XP Printer Installation Guide

1) Open Internet Explorer (not Firefox, Netscape, Chrome, or Safari)

2) Go to www.masters.edu/printers

3) Under the “Windows Users” section, click the “CLICK HERE” link to connect to the print server

4) In the box that pops up, enter your TMC username (including “@masters.edu” NOT “@mail.masters.edu”) and password, and check the “Remember my password” option

5) Select the printer you want to install
6) Click on the yellow Information Bar that drops down and select “Run Add-on”

7) Click “Run”

8) On the navigation menu to the left, click “Connect” (if you cannot see the Connect option, you did not correctly install the add-on from Step 6 – close Internet Explorer and start the installation process again)

9) Click on the yellow Information Bar that drops down and select “Run Add-on”

10) Click “Run”
11) On the navigation menu to the left, click “Connect” and then “No” on the box that pops up (there is one more add-on that needs installation)

12) Click on the yellow Information Bar that drops down and select “Run Add-on”

13) Click “Run”
14) On the navigation menu to the left, click “Connect” and then “Yes” on the box that pops up

15) Select the “Use the specified user account” option on the dialogue box that pops up, and enter your TMC username (including “@masters.edu” NOT “@mail.masters.edu”) and password
